YELAM VENKATA KIRAN

Software Engineer

+91 7702296369 | Hyderabad, Telangana (Open to Relocate: Bengaluru) | venkatakiranyelam@gmail.com | LinkedIn | GitHub

Professional Summary

Software Engineer with nearly two years of experience developing enterprise and AI-driven applications using Python, Java, React.js, and SQL. Experienced in designing REST APIs, building scalable software solutions, and delivering production-grade applications using Agile methodologies.

Technical Skills

Languages	Python, Java, JavaScript (ES6+), SQL, HTML5, CSS3
Core Concepts	Object-Oriented Programming (OOP), Data Structures, Algorithms, REST APIs, SDLC, Agile Development
Frameworks	React.js, Spring Boot, WordPress, WooCommerce
Databases	Oracle SQL, MySQL
Tools	Git, GitHub, Postman, VS Code, ROS2, Gazebo, YOLO, OpenCV, Computer Vision

Education

Bachelor of Technology – Mechanical Engineering **2019 – 2023**
KKR & KSR Institute of Technology and Sciences, Guntur CGPA: 7.2

Professional Experience

Software Engineer **May 2024 – Jul 2024**
Albanero Solutions Pvt. Ltd. (Later Acquired by Infor)
- Built responsive React.js interfaces with reusable components, integrated REST APIs, and resolved UI defects in an Agile team.

Associate Software Engineer **Jul 2024 – Jan 2026**
Infor India Pvt. Ltd.
- Developed enterprise modules for the Infor Data Mesh platform using React.js, JavaScript, HTML5, and CSS3; built interactive business dashboards with Apache Superset.
- Designed RESTful APIs with Java, Spring Boot, and SQL to manage and synchronize customer, supplier, and item master data with Infor M3; participated in code reviews, debugging, and testing to ensure high-quality software delivery.
- Handled last-minute release fixes, resolved critical production issues, and collaborated using Git for version control within Agile development teams.

Software Engineer **Jan 2026 – Present**
Krisi Vahana Pvt. Ltd.
- Developed an AI-powered tomato ripeness detection system using Python, YOLO, and Computer Vision, improving object detection accuracy through dataset optimization.
- Designed and developed a full custom e-commerce platform (WordPress, WooCommerce, PHP, JS) including landing pages, cart, checkout, and account modules.
- Built software to calculate real-world coordinates of objects from camera input, enabling accurate distance estimation for robotic arm integration.

Projects

AI-Based Tomato Ripeness Detection *(Python, YOLO, OpenCV, Computer Vision)*
- Developed the application using Python, YOLO, and OpenCV for real-time tomato ripeness detection.
- Performed dataset preprocessing, annotation, model training, testing, and accuracy optimization.
- Automated image processing and prediction workflows using Python.

Agricultural Robotic Arm Prototype *(ROS2, Gazebo)* Designed and simulated a harvesting robotic arm with motion planning, hardware control, and autonomous operation.

Custom WooCommerce E-Commerce Platform *(WordPress, PHP, JS, CSS)* Built a full-featured responsive store with custom landing, cart, checkout, and account modules; optimized for performance and UX.

Certifications

TCS iON Career Edge – Young Professional | C Programming Certification – APSSDC
